J35™ Pro

The ultimate desktop 3D printer. Prototyping in translucent and grayscale colours has never been easier or more affordable, giving you one of the most accessible multi-material design tools yet. From simple models all the way to simulating overmoulding with rubber, create in-house with greater control. Low maintenance, odour-free, and with a small footprint, the J35 starts saving time and money from the moment it begins its first print.

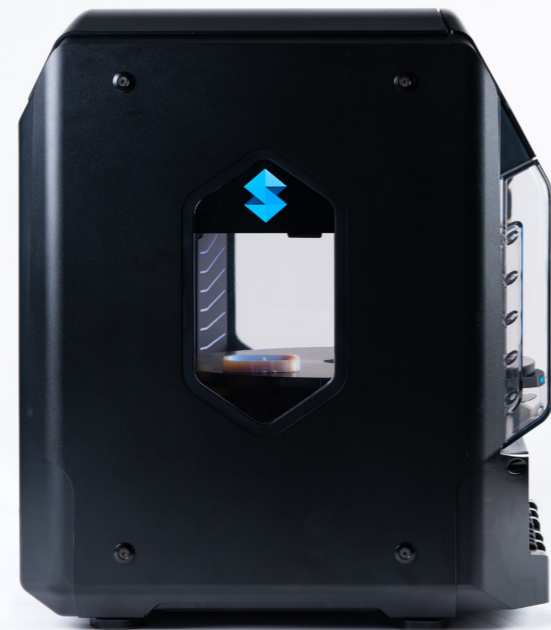

Versatile.
Low cost of ownership.
Easy to use.
Office friendly.

We're really excited about what the J35 can offer – quick and easy prototyping for a minimal cost, ready to fit into an office and start reaping the benefits of PolyJet 3D printing for small-to-medium businesses.

Robert Thompson, SYS Systems
Stratasys Platinum Partner

The J35 is built to answer the demands of in-house design with affordable cost of ownership that still delivers in versatility and quality. Produce prototypes, concept models, jigs and fixtures, functional parts, and much, much more. Create them all in one machine with lower cost per part and none of the lead times of typical outsourcing.

Print using three materials simultaneously on the same build tray, allowing you to combine rigid with rubber-like, opaque with translucent, and even include biocompatible material.

Cartridge hot swapping also enables Long Print Mode for more consumable-demanding jobs.

Quiet, economical, and capable – set up your J35 anywhere, plug in, and start printing. Turn to GrabCAD Print™ support for a smooth, smart workflow with notifications for job alerts, remote scheduling and monitoring of tasks, multiple printer control, and more. Fine-tune the texture and material mixture of your models for high-quality proof of concept that grants quicker decisions, quicker time to market, quicker returns on your investment.

SPECIFICATION

Machine Size: 651 x 661 x 774mm

Machine Weight: 98 kg with consumables

Build Envelope: 1,174cm²

Layer Thickness: 18 microns

Materials:

VeroUltra™ClearS

VeroUltra™BlackS

VeroUltra™WhiteS

DraftGray™

D-ABS Plus™

Elastico™ Black

Elastico™ Clear
